Phase II and Phase III Project Cover Sheet

All information contained within the individual site database and inventory sheets is solely the work of the researchers and authors noted below. The data provided has been culled from the original site reports noted below and in many cases has been lifted directly from them with little or no editing. The database and inventory sheets are meant to serve as a synopsis of the report findings and a finding aid and are not intended to replace or republish the research of the authors noted below.

REPORT INFORMATION:

1982 Basalik, K.J. and T.M. Payne

An Intensive Archaeological Survey at the H and S Bakery Building Site: An Executive

Summary Report.

Submitted to H and S Bakery, Inc.

Library ID No: 00005573 Catalog/Shelving ID: BC 8 Research Firm/Institutution:

Cultural Heritage Research Services, Inc. PO Box 1154 Brookhaven, PA 19015

Sites examined:

18BC32

NRHP Eligible: Y Justification

Project Details:

Phase I Phase II

Phase III

Project Justification:

This report describes the 1981-1982 intensive archeological investigation at a building site adjacent to the H & S Bakery in downtown Baltimore. The H & S Bakery was proposing to expand their facilities and required HUD approvals in order to proceed with the demolition of the (then) standing structure on site and expansion of the bakery. This HUD request triggered Section 106 compliance and the need for the survey.

Project Objectives:

-Delineate the nature and significance of any archeological remains located on Site 18BC32.

Research Potential:

Based on the findings from 1981 and 1982, full data recovery was recommended. This appears to have been cost prohibitive for the H & S Bakery. Site files suggest that they "refused" to fund additional work, but a deal was worked out whereby the expansion could be constructed on a concrete slab. This concrete slab effectively preserved 18 of the 22 features beneath the present H & S Bakery building. The presence of intact features and middens dating to various stages in the 19th century development of Baltimore suggests that the site is significant and retains research potential. It has been determined eligible for listing on the National Register.
